

WWF (Taking Action!)

Written by staff members from the organization, this title provides an overview of the World Wildlife Fund (WWF). It explores how the organization was set up and what it has developed into. Case studies explore how a variety of people in the organization spend their working day, and examine the work done in the various areas that the organization is concerned with. It ends with a look into the future where the vision of the organization is explored. The book is part of a series of titles each of which provide an overview of a charity or other non-governmental organization to give an insight into its purpose and method of working.
